## Professional Summary

Aspiring AI/ML Engineer and Data Science undergraduate pursuing B.Tech in Computer Science and Engineering with hands-on experience in Python, SQL, Machine Learning, Natural Language Processing (NLP), Power BI, and Data Analytics. Skilled in predictive modeling, data preprocessing, exploratory data analysis, and AI application development using Scikit-learn, Pandas, and NumPy. Familiar with Generative AI tools including ChatGPT and Gemini, with a strong interest in developing intelligent systems that solve real-world problems.

## Education

|                                                                             |                    |
|-----------------------------------------------------------------------------|--------------------|
| <b>B.Tech in Computer Science and Engineering</b>                           | <b>2023 – 2027</b> |
| Noida Institute of Engineering & Technology, Greater Noida<br>CGPA: 8.10/10 |                    |
| <b>Class XII</b>                                                            | <b>2021 – 2022</b> |
| St. Joseph School, Sonbhadra<br>Percentage: 87.2%                           |                    |
| <b>Class X</b>                                                              | <b>2019 – 2020</b> |
| New Stewart School, Cuttack<br>Percentage: 86.6%                            |                    |

## Technical Skills

- **Programming:** Python, SQL, Java
- **Machine Learning:** Scikit-learn, Regression, Classification, Clustering, Model Evaluation, Feature Engineering
- **Data Analysis:** Pandas, NumPy, Data Cleaning, Exploratory Data Analysis (EDA)
- **Data Visualization:** Power BI, Tableau, Matplotlib, Seaborn
- **Artificial Intelligence:** Machine Learning, Natural Language Processing (NLP), Prompt Engineering, ChatGPT, Gemini, Claude
- **Database:** MySQL
- **Tools:** Git, GitHub, Jupyter Notebook, VS Code, Power BI Desktop

## Projects

|                                                                                                                                                                                                                                                                                                                                                                                                                    |                              |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------|
| <b>Kisan-Mitra</b>                                                                                                                                                                                                                                                                                                                                                                                                 | Python, Machine Learning     |

## **SMS Spam Detection using NLP**

Python, NLP, Scikit-learn

[github.com/Sheran2004/SMS-Spam-Detection](https://github.com/Sheran2004/SMS-Spam-Detection)

- Developed a Natural Language Processing (NLP) model to classify SMS messages as spam or ham.
- Applied text preprocessing techniques including tokenization, stop-word removal, stemming, and TF-IDF vectorization.
- Trained and evaluated machine learning classifiers using Scikit-learn to improve spam detection performance.

## **Certifications**

---

- Machine Learning Using Python – Infosys Springboard
- Excel and Power BI Certification
- Deloitte Australia Technology Job Simulation

## **Relevant Coursework**

---

Machine Learning, Artificial Intelligence, Data Structures & Algorithms, Database Management Systems, Statistics, Object Oriented Programming, Operating Systems

## **Achievements**

---

- Solved 150+ coding and problem-solving challenges across coding platforms.
- Developed multiple end-to-end Machine Learning, AI, and Data Analytics projects using Python and Power BI.
- Participated in Cognizant Technoverse Hackathon 2026.
